Citizen Science

Research projects increasingly invite members of the public to collect observations. Volunteers can record bird sightings, rainfall, insects, or changes in local plants across very large areas. Because participants have different levels of experience, researchers must provide clear instructions and quality checks. In practical terms, public volunteers can greatly expand the area scientists are able to observe. However, well-designed projects can produce valuable data while also increasing public interest in science. This limitation is important because quality control is important because volunteers vary in experience. For that reason, digital apps have made it easier to submit photographs and locations for later verification.

9. What is the main purpose of the passage?

- A. Show how citizen science can support research and what challenges it creates
- B. describe only the historical origins of citizen science
- C. argue that citizen science should be avoided in every situation
- D. compare two unrelated technologies without reaching a conclusion

10. According to the passage, which statement is true?

- A. The passage states that no practical limitations have been identified.
- B. Public volunteers can greatly expand the area scientists are able to observe.
- C. The main benefit described in the passage has been completely disproved.
- D. The approach described is useful only in laboratory settings.

11. The word verification is closest in meaning to:

- A. changing without any pattern
- B. impossible to measure
- C. Checking that something is correct
- D. unrelated to the subject

12. Which of the following can be inferred from the passage?

- A. The author believes that one simple action can solve every related problem.
- B. The approach described has no costs or disadvantages.
- C. Quality control is important because volunteers vary in experience.
- D. Further planning or evaluation is unnecessary once the approach is adopted.

13. Which statement best reflects the author's view?

- A. The subject has already solved all of the problems discussed.
- B. The subject has potential benefits, but its success depends on how it is implemented.
- C. The subject is entirely ineffective and should be abandoned.
- D. The subject is useful only because it is inexpensive.

SECTION 4 - Restatements
