Remote Work and Cities

Remote work has changed commuting patterns for some employees. When people travel to central offices less often, demand may fall for transport and businesses that depended on office workers. At the same time, neighborhood cafes and local services may gain customers who now spend more weekdays near home. In practical terms, remote work can shift economic activity within a city. However, the effects vary because many jobs cannot be done remotely and company policies differ widely. This limitation is important because the effects of remote work are not identical for every neighborhood or occupation. For that reason, urban planners are studying these changes before making long-term decisions about transport and office districts.

9. What is the main purpose of the passage?

- A. Describe how remote work may alter urban activity
- B. argue that remote work and cities should be avoided in every situation
- C. compare two unrelated technologies without reaching a conclusion
- D. describe only the historical origins of remote work and cities

10. According to the passage, which statement is true?

- A. Remote work can shift economic activity within a city.
- B. The approach described is useful only in laboratory settings.
- C. The passage states that no practical limitations have been identified.
- D. The main benefit described in the passage has been completely disproved.

11. The word vary is closest in meaning to:

- A. Differ from one case to another
- B. changing without any pattern

- D. unrelated to the subject

12. Which of the following can be inferred from the passage?

- A. Further planning or evaluation is unnecessary once the approach is adopted.
- B. The approach described has no costs or disadvantages.
- C. The author believes that one simple action can solve every related problem.
- D. The effects of remote work are not identical for every neighborhood or occupation.

13. Which statement best reflects the author's view?

- A. The subject has potential benefits, but its success depends on how it is implemented.
- B. The subject has already solved all of the problems discussed.
- C. The subject is entirely ineffective and should be abandoned.
- D. The subject is useful only because it is inexpensive.
