5 questions | 15 minutes

**Language Learning and Spacing**

People often remember vocabulary better when study sessions are spread over time. One important reason is that reviewing a word after some forgetting has occurred can strengthen later recall. In addition, very long single study sessions may create a feeling of familiarity that does not always last. Researchers therefore note that spaced review can improve long-term vocabulary retention. Nevertheless, the best spacing interval depends on how long the learner needs to remember the material. The issue is not simply whether the approach has value, but under which conditions it works best. In particular, the ideal spacing schedule depends on the learner's goal. For this reason, language teachers therefore combine repeated exposure with gradually increasing gaps between reviews.

**9. What is the main purpose of the passage?**

- A. compare two unrelated technologies without reaching a conclusion
- B. describe only the historical origins of language learning and spacing
- C. Explain why spaced practice can support language learning
- D. argue that language learning and spacing should be avoided in every situation
