Repair Cafes

Repair cafes are community events where volunteers help people fix broken household items. This development is often justified by the fact that participants may bring lamps, clothing, bicycles, or small appliances and learn basic repair skills; moreover, not every item can be repaired safely, and volunteers must recognize when professional service is required. Taken together, these points suggest that repair cafes combine waste reduction with community learning. Yet the apparent advantages should not be treated as automatic, because even unsuccessful repairs can help users understand why a product failed. A careful interpretation therefore requires attention to the conditions under which the method is used. In particular, volunteers should not attempt every possible repair. Consequently, supporters see these events as a way to reduce waste and share practical knowledge.

9. What is the main purpose of the passage?
