Algorithmic Recommendations

Online platforms often recommend music, videos, or products based on previous behavior. This development is often justified by the fact that recommendation systems can help users find relevant material in very large collections; moreover, if the system repeatedly favors similar items, users may be exposed to a narrower range of choices. Taken together, these points suggest that recommendation systems can improve convenience while also narrowing exposure. Yet the apparent advantages should not be treated as automatic, because designers can adjust algorithms to include novelty or diversity as well as predicted preference. A careful interpretation therefore requires attention to the conditions under which the method is used. In particular, algorithms can be designed to introduce more diverse options. Consequently, the challenge is balancing convenience with opportunities for discovery.

9. What is the main purpose of the passage?

- A. describe only the historical origins of algorithmic recommendations
- B. Discuss both the usefulness and possible limitations of recommendation systems
- C. compare two unrelated technologies without reaching a conclusion
- D. argue that algorithmic recommendations should be avoided in every situation

10. According to the passage, which statement is true?

- A. The passage states that no practical limitations have been identified.
- B. The main benefit described in the passage has been completely disproved.
- C. The approach described is useful only in laboratory settings.
- D. Recommendation systems can improve convenience while also narrowing exposure.

11. The word **novelty** is closest in meaning to:

- A. Something new or unfamiliar
- B. unrelated to the subject
- C. impossible to measure
- D. changing without any pattern

12. Which of the following can be inferred from the passage?

- A. Algorithms can be designed to introduce more diverse options.
- B. The approach described has no costs or disadvantages.
- C. The author believes that one simple action can solve every related problem.
- D. Further planning or evaluation is unnecessary once the approach is adopted.

13. Which statement best reflects the author's view?

- A. The subject has already solved all of the problems discussed.
- B. The subject is useful only because it is inexpensive.
- C. The subject has potential benefits, but its success depends on how it is implemented.
- D. The subject is entirely ineffective and should be abandoned.
